

UNIVERSAL MOUNTING PLATE FOR CASTERS

Provides You with Flexibility and Reduces Inventory...

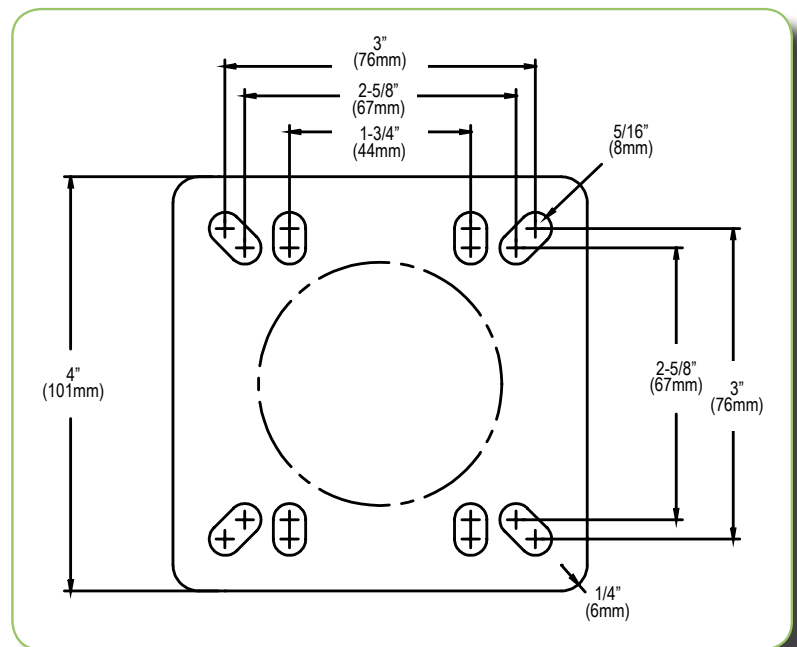

CHG's new Universal Mounting Plate, which is available on all of our 5" diameter medium duty casters, has multiple bolt hole patterns to accommodate various mounting applications. This provides you with the flexibility to change between equipment legs and casters without having to drill new mounting holes.

The Universal Mounting Plate also makes these ideal replacement casters for dealers. The multiple bolt hole patterns means you can stock fewer casters, while still covering the most common caster and leg mounting options. The plate accommodates 1-3/4" x 3", 2-5/8" x 2-5/8" and 3" x 3" hole patterns with 5/16" slotted bolt holes.

In addition, the 4" x 4" OA square plate is constructed of heavy-duty 9-gauge zinc plated steel for strength and durability.

- Bolt Hole Patterns Accommodate 1-3/4" x 3", 2-5/8" x 2-5/8" and 3" x 3"
- Reduces Required Caster Inventory While Providing Mounting Flexibility
- Available for 5" Medium Duty Casters Only
- 4" x 4" OA 9-Gauge Zinc Plated Steel Plate
- 5/16" Diameter Slotted Mounting Holes For Easy Adjustability
