

SANIGUARD® Door Pull/Push Plates

For Lavatory, Restroom, Commercial and Foodservice Applications

Whether you want to get in or out, CHG's line of stainless steel door push and pull plates can lend a hand. All of our push/pull plates feature SANIGUARD® antimicrobial product protection to inhibit the growth of bacteria, molds and fungi that cause odors and staining. As an added benefit, SANIGUARD product protection also virtually eliminates fingerprints on coated surfaces. SANIGUARD product protection will continue to provide non-stop product protection for the useful life of the treated product. SANIGUARD product protection is designed to keep the product fresher and cleaner between normal cleaning routines. It is not a disinfectant and will not protect users or others against food-borne illness or disease. Always use good hygiene and cleaning practices.

- All Stainless Steel Construction
- Retro-fits to most common push/pull plate hole-patterns
- SANIGUARD product protection inhibits the growth of bacteria, molds and fungi, which can cause odors and staining and eliminates fingerprints
- SANIGUARD product protection will last for the useful life of the product
