

# SaniGrasp<sup>™</sup> Door Handle for Lavatories/Restrooms

*Eliminates the need to touch dirty door knobs and handles after washing your hands*

CHG proudly introduces its SaniGrasp door pull for use on public restroom doors, effectively eliminating the need for you to touch a dirty door knob after washing your hands ever again.

SaniGrasp is a patented stainless steel door pull that permits you to use your forearm instead of your hands to open the door. SaniGrasp has been treated with SANIGUARD<sup>®</sup> product protection which is an inorganic, silver-ion, antimicrobial treatment to inhibit the growth of microorganisms that can cause odors and staining. SANIGUARD product protection is designed to keep the product fresher and cleaner between normal cleaning routines. It is not a disinfectant and will not protect users or others against food-borne illness or disease. Always use good hygiene and cleaning practices.

SaniGrasp is rugged enough to withstand everyday abuse and its

hole pattern is designed to retrofit to most existing door pull plates on the market today. The SaniGrasp also features engraved door opening instructions on the back plate to insure proper use and comes complete with mounting hardware.

SaniGrasp is compliant with both the Americans with Disabilities Act (ADA) of 1990 and the Architectural Barriers Act (ABA) of 1968.

For more information on SaniGrasp and SANIGUARD<sup>®</sup> antimicrobial product protection, call **800-526-3694**, or visit us at [www.chgusa.com](http://www.chgusa.com)
