

Component Hardware® Stainless Steel  
 Leg Socket

# A19-1000

**PATENT PENDING**

16 Gauge all stainless steel leg socket

**Heavy Duty Construction**

- Unique interior geometry tightly fits the diameter of the leg
- Increased surface contact improves stability
- 2" outside diameter for 1-5/8" O.D. tubing applications
- Satin stainless steel finish
- Flanged top for ease of welding
- Permits KD shipping to reduce freight costs

**Specifications**

Stainless steel leg socket to be Component Hardware A19-1000. Leg socket to be constructed of 16 gauge (1.5mm) stainless steel and shaped for tight circumferential fit to 1-5/8" leg assembly. Locking set screw\* to ensure secure assembly.

\*NSF Standards governing use of set screws in non-food zones requires the plugging of the hex socket hole after final assembly and tightening. This may be accomplished by applying a hardening type of silicone sealant or the use of a hole plug. Standard NSF type push-in plastic hole plugs are available. Specify A10-0020 when ordering. Additional set screws are available. Specify A18-X001 when ordering.
