

Regal Ride™ Expanding Rubber Stem Caster Installation Guide

Step 1: While firmly holding the Swivel Bearing Cover (D), turn the Knurled Top Nut (A) clockwise to begin compressing the Expanding Rubber Sleeve (B). Compress the Expanding Rubber Sleeve (B) until you have a snug friction fit going into the tubing leg.

Step 2: Now, insert the entire Expanding Stem Assembly (F) into the tubing leg until the tubing rests upon the Swivel Bearing Cover (D).

Step 3: Turn the Swivel Bearing Cover (D) counter-clockwise by hand to further compress the Expanding Rubber Sleeve (B) inside the tubing. Finish tightening with a wrench by turning the Hex Nut (E), found under the metal fork assembly, counter-clockwise until snug.
