

COMPONENT[®] HARDWARE

Building better business, one part at a time.

YOUR FIRST SOURCE
FOR VALUE, ENGINEERING, INNOVATION AND QUALITY

**YOUR FIRST SOURCE
FOR VALUE, ENGINEERING, INNOVATION AND QUALITY**

For over 35 years Component Hardware has been providing high quality components to its customers. Our global sourcing capabilities and long-term close relationships with our manufacturing partners enable us to offer a wide range of production processes, giving our customers complete design flexibility. If you can design it, we can supply it!

FORGING

DIE CASTING

**INVESTMENT
CASTING**

SAND CASTING

**STAMPING AND
METAL FORMING**

MACHINING

**PLASTIC INJECTION
MOLDING AND
EXTRUDING**

WIRE FORMING

**PLATING
AND COATING**

**RAPID PROTOTYPING AND
STEREOLITHOGRAPHY SLA**

INNOVATIVE ENGINEERING

Component Hardware's capabilities include onsite design and technical assistance. Our full-time staff of engineers utilizes SolidWorks 3-D CAD technology and stereolithography apparatus (SLA) to go from product concept to production in the shortest time possible at the lowest cost.

QUALITY ASSURANCE

Our engineers work closely with industry regulatory agencies such as NSF, UL, CSA, EPA/WaterSense and NFPA to ensure that our products meet or exceed the latest standards.

Our major factories are ISO 9001 certified and our engineers monitor the quality process from design to finished product.

COMMITMENT TO INVENTORY

Component Hardware maintains over 10,000 SKUs in nearly 300,000 square feet of warehouse space in the US, Canada and Europe. Almost 40% of these are proprietary for specific customers. We make a heavy investment in inventory to support our customers' need for an uninterrupted supply of products.

UNPARALLELED CUSTOMER SERVICE

Our Customer Service team works closely with our Business Development Managers to truly know our customers and understand their needs. Partnering with our purchasing and warehouse staff, they make sure orders are shipped in the shortest possible lead time—usually 3 days or less.

METALS

- Fabrication
- Castings
- Tubing
- Assembly & sub-assembly
- Weldments
- Extrusions
- Machined parts
- Wire forms/racks/shelves
- Stampings
- Deep draw

PLASTICS

- Fabrication
- Injection molding
- Blow molding
- Vacuum forming
- Extrusions
- Machined parts
- Insulation injection

RUBBER

- Molding
- Extrusions
- Bonding
- Fabrication
- Laminating
